

To our Patients & the Community,

Your health and wellbeing are important to us and as you know the world is experiencing notable person-to-person transmission of COVID-19 (Coronavirus). We understand, deeply respect, and share your concern about COVID-19 infection in public places.

Until further direction or mandate from the American Dental Association, Maryland Government, or Federal Government, we intend to abide by the American Dental Association's recommended operation guidelines and continue serving our patients' emergency oral health needs.

We have always practiced the highest, hospital grade standards for disinfection and sterilization of our facility and will be extending these practices to our non-clinical areas such as the waiting room and front desk to keep both our patients and our team safe from any infection to the best of our abilities possible.

If you are experiencing a dental emergency, please do not hesitate to give us a call at (410) 228-4191. We will be available by phone from 7:00am-6:00pm Monday through Friday, and from 7:00am to 12:00pm each day for patient care.

If you are experiencing symptoms of possible infection and a dental emergency, we ask that you consult with your primary care physician first. We need to confirm that you have not been infected with COVID-19 before we can treat you for your dental emergency.

We appreciate your understanding as we walk through this situation of great uncertainty together.
